

# BATORY FOODS®

Ingredients in Motion™

**Nothing but the best for the pets we love the most.** The pet food market grows more sophisticated each year as consumers become more educated about proper nutrition for their animal companions. 69% of U.S. pet owners believe their choice of products for their pets reflects their own personal values and preferences, driving demand for “clean-label,” Non-GMO, and organic options. New products must take into consideration pet owners’ demands for ingredient quality, safety, and accountability. Laws on labeling, sales claims, and manufacturing fall under different FDA and DOA regulations that often vary from one state to another. Batory Foods offers a broad portfolio of ingredients, along with industry knowledge and experience, to help guide your team in the right selection.
